Index of Subjects

Note. Short Communications are distinguished by C. Pages in *Proceedings of The Biochemical Society* are distinguished by P. Entries marked with an asterisk (*) refer to communications made in title only.

Acacia auriculiformis, a new flavan-3,4-diol obtained from, by paper ionophoresis (Drewes, S. E. & Roux, D. G.) 493

cis- and *trans*-Acenaphthene-1,2-diol, metabolic ring-fission of (Hopkins, R. P. & Young, L.) 19

[1-^{14}C]Acetate, incorporation of, into the methyl ketones in steam-distillates of bovine milk fat (Lawrence, R. C. & Hawke, J. C.) 25

[^{14}C]Acetate, incorporation of, into thiamine in yeast (Johnson, D. B., Howells, D. J. & Goodwin, T. W.) 30

Acetylcholine, synthesis of, by human placenta (Morris, D.) 754

Acetylcholinesterase, inhibited, dealkylation studies on (Coult, D. B., Marsh, D. J. & Read, G.) 869

Acetylenes, natural, origin of (Bu'Lock, J. D. & Smith, G. N.) 6P

β-Acetylglucosaminase, purification of, from ram testis (Caygill, J. C., Roston, C. P. J. & Jevons, F. R.) 405

Actinomycin D, effect of, on rat-liver polyribosomes (Franklin, T. J. & Godfrey, A.) 513

Actinomycin D, effect of, on ribonucleic acid synthesis during the early action of thyroid hormones (Tata, J. R. & Widnell, C. C.) 604

Acrylonitrile, use of, for the subtractive identification of the *N*-terminal residues of small peptides (Fletcher, J. C.) 34C

Adenine nucleotides, effects of, on carbohydrate metabolism in pigeon-liver homogenates (Gevers, W. & Krebs, H. A.) 720

Adenosine diphosphate and adenosine triphosphate in plasma, breakdown of (Mills, D. C. B.) 32P

Adenosine 3′-phosphate 5′-sulphatophosphate, formation of, in chloroplast fragments from *Euglena gracilis* (Davies, W. H., Mercer, E. I. & Goodwin, T. W.) 369

Adenosine 5′-phosphate, synthesis of, in plants (Hatch, M. D.) 198

Adenosine-triphosphatase activity, effects of cystamine and cysteamine on, of rat-liver mitochondria (Skrede, S.) 702

Adenosine triphosphate and adenosine diphosphate in plasma, breakdown of (Mills, D. C. B.) 32P

Adenylosuccinate synthetase and adenylosuccinate lyase from plant tissues (Hatch, M.D.) 198

Adipose tissue, biosynthesis of squalene and sterols by, in rat, sheep and man (Durr, I. F.) 317

Adrenals, rat, characterization of ribonucleases and ribonuclease inhibitor in subcellular fractions from (Girija, N. S. & Sreenivasan, A.) 562

Adrenocorticotrophic hormone, effects of prolonged incubation of isolated fat cells on their response to (Galton, D. J. & Fain, J. N.) 557

Agmatine, detection of conjugates of, in scorpions (Hitchcock, M. & Smith, J. N.) 736

[^{14}C]Alanine, incorporation of, into thiamine in yeast (Johnson, D. B., Howells, D. J. & Goodwin, T. W.) 30

Alkyl halides, enzyme-catalysed reaction of, with glutathione (Johnson, M. K.) 44

sec.-Alkyl methylphosphonofluoridates, dealkylation of acetylcholinesterase inhibited by (Coult, D. B., Marsh, D. J. & Read, G.) 869

Allocholic acid, presence of, in mammalian (including human) bile (Tammar, A. R.) 25P

Amino acid composition of finback-whale myoglobin (Atassi, M. Z. & Saplin, B. J.) 82

Amino acid composition of microfibrils in *Hevea brasiliensis* latex (Audley, B. G.) 335

Amino acids, free, distribution of, in subcellular fractions of guinea-pig brain (Mangan, J. L. & Whittaker, V. P.) 128

Amino acids, factors controlling incorporation of, by ribosomes from Krebs II ascites-tumour cells (Kerr, I. M., Cohen, N. & Work, T. S.) 826

Amino acids, factors affecting the effect of insulin on incorporation of, in isolated diaphragm (Manchester, K. L.) 711

Amino acids, ^{14}C-labelled, effect of 4-dimethylamino-3′-methylazobenzene on incorporation of, by rat-liver polysome preparations (Hawtrey, A. O. & Nourse, L. D.) 682

Amino acids, proteins and peptides of mature bovine enamel, studies of (Glimcher, M. J. & Levine, P. T.) 742

α-Amino, ε-amino and imidazole groups of proteins, determination of the substitution achieved at, with special reference to derivatives of gelatin (Leach, A. A.) 506

Aminoacetone production by micro-organisms (Turner, J. M.) 7P

γ-Aminobutyrate, distribution of, in subcellular fractions of guinea-pig brain (Mangan, J. L. & Whittaker, V. P.) 128

Aminotransferase, rat-tissue, acting on L-tyrosine *O*-sulphate (Rose, F. A., Flanagan, T. H. & John, R. A.) 168

Angolide from *Pithomyces sacchari* (Speg.) M. B. Ellis, isolation of (Riches, P. & Russell, D. W.) 8P

Anthraquinone pigments from *Phoma foveata* Foister (Bick, I. R. C. & Rhee, C.) 112

Artichoke, transfructosylation in tubers of (Edelman, J. & Dickerson, A. G.) 787

Ascites-tumour cells, Krebs II, asymmetric transcription of deoxyribonucleic acid by deoxyribonucleic acid-dependent ribonucleic acid polymerase of (Shenkin, A. & Burdon, R. H.) 5C

Ascites-tumour cells, Krebs II, factors controlling amino acid incorporation by ribosomes from (Kerr, I. M., Cohen, N. & Work, T. S.) 826

Ascorbic acid, *see* Vitamin C

Aspergillus fumigatus I.M.I. 89353, conversion of [^{14}C]-orsellinic acid and [^{14}C]orcinol into fumigatol by (Packter, N. M.) 353

Bacillus cereus 569, zinc as a cofactor for cephalosporinase from (Sabath, L. D. & Abraham, E. P.) 11C

Bacillus megaterium, isolation and analysis of the protoplast membrane of (Yudkin, M. D.) 923

Bacillus subtilis, fractionation of transforming deoxyribonucleic acid from (Ayad, S. R., Barker, G. R. & Jacob, A. E.) 3P

Bacteria, extrachromosomal genes and enzyme synthesis in (Richmond, M.H.) 1P

Bacteria, phage-infected, fractionation of deoxyribonucleic acid from (Smith, M. G. & Burton, K.) 229

Bacteria, synthesis and possible character of a high-energy intermediate in photophosphorylation by (Horio, T., Nishikawa, K. & Yamashita, J.) 321

Bean leaves, senescent, nucleic acids of (Wood, A. & Bradbeer, J. W.) 32P

Benzimidazole derivatives as uncouplers of oxidative phosphorylation (Beechey, R. B.) 284
Benzoic acid, metabolism of, in arachnids (Hitchcock, M. & Smith, J. N.) 736
Beryllium, inhibition of enzymes by (Thomas, M. & Aldridge, W. N.) 94
Beryllium, kinetics of inhibition of phosphoglucomutase by (Aldridge, W. N. & Thomas, M.) 100
Bile, mammalian (including human), presence of allocholic acid in (Tammar, A. R.) 25P
Biotin, incorporation of [^{35}S]sulphate in studies on an early intermediate in the biosynthesis of (Eisenberg, M. A.) 15C
trans-1,4-Bis-(2-chlorobenzylaminomethyl)cyclohexane dihydrochloride (cholesterol-biosynthesis inhibitor), effect of, on the fatty acid composition of phospholipids in the serum and tissues of rats (Hill, P.) 696
Blastocladiella, the 'point of no-return' in cell differentiation in (Cantino, E. C.) 2P
Blowfly (*Lucilia cuprina*), changes in the activity of respiratory enzymes during the development of (Lennie, R. W. & Birt, L. M.) 42P
Blowfly (*Lucilia cuprina*), changes in the lipid content during metamorphosis of (D'Costa, M. A. & Birt, L. M.) 42P
Blowfly (*Lucilia cuprina*), nicotinamide–adenine nucleotides during the life cycle of (Birt, L. M.) 41P
Bombyx mori L., *see* Silkworm
Bone rudiments, chick-limb, cultured, effect of retinol and hydrocortisone on (Dingle, J. T., Fell, H. B. & Lucy, J. A.) 173
Brain, guinea-pig, distribution of free amino acids in subcellular fractions of (Mangan, J. L. & Whittaker, V. P.) 128
Brain, incorporation of the phosphate esters of *N*-substituted aminoethanols into phospholipids of (Ansell, G. B. & Chojnacki, T.) 303
Brain, ox, presence of phosphatidylcholine in neurons isolated from the lateral vestibular nucleus of (Johnston, P. V. & Roots, B. I.) 157
Brain, rat, developing, relationship between cellular nucleic acids in (Adams, D. H.) 636
Brain, rat, incorporation of [^{32}P]phosphate into the phosphoinositides of subcellular fractions from (Kai, M. & Hawthorne, J. N.) 62
Brain, rat, metabolism of cellular membrane sulpholipids in (Davison, A. N. & Gregson, N. A.) 915
Brain structure, lipid metabolism in relation to (Davison, A.N.) 17P
Brush border, intestinal, role of, in the absorption of cholesterol in rats (David, J. S. K., Malathi, P. & Ganguly, J.) 662

Camel myoglobin, preparation and properties of (Awad, E. S. & Kotite, L.) 909
Camellia sinensis L., *see* Tea plant
Carbohydrate, changes in, during the aerobic growth cycle of yeast (Polakis, E. S. & Bartley, W.) 883
Carbohydrate content of rat-heart slices, changes in (Bartley, W. & Dean, B.) 41P
Carbohydrate metabolism, effects of adenine nucleotides on, in pigeon-liver homogenates (Gevers, W. & Krebs, H. A.) 720
Carbohydrate *O*[^{35}S]-sulphate and *N*[^{35}S]-sulphate esters, self-irradiation of (Lloyd, A. G., Balazs, E. A., Embery, G. & Wusteman, F. S.) 34P
Carbonic anhydrase, kinetics of the inhibition of, by sulphonamides (Kernohan, J. C.) 31P
Carboxymethylcellulose, preparation and properties of ficin chemically attached to (Hornby, W. E., Lilly, M. D. & Crook, E. M.) 410
Carcinogens, concentration and biosynthesis of nicotinamide nucleotides in the livers of rats treated with (Clark, J. B., Greenbaum, A. L. & McLean, P.) 546
Carnitine-palmitoyltransferase reaction as the rate-limiting step in the oxidation of palmitate or palmitoylcoenzyme A by rat-liver mitochondria (Shepherd, D., Yates, D. W. & Garland, P. B.) 3C
Carnitine, stimulation of short-chain fatty-acid oxidation by, in rat-liver mitochondria (Hird, F. J. R. & Weidemann, M. J.) 378
Cartesian-diver micro-gasometer, oxygen consumption of isolated pancreatic islets of mice studied with (Hellerström, C.) 7C
Catecholamine and tryptamine derivatives, fluorescence method for the detection and possible quantitative assay of, on paper (Bell, E. C. & Somerville, A. R.) 1C
Cephalosporinase, zinc as a cofactor for, in *Bacillus cereus* 569 (Sabath, L. D. & Abraham, E. P.) 11C
Ceramide hexosides identified as components of glycolipids of normal human leucocytes (Miras, C. J., Mantzos, J. D. & Levis, G. M.) 782
Cerebral cortex, rat, developing, relationship between cellular nucleic acids in (Adams, D. H.) 636
Chlorogenic acid, enzymic oxidation of, and some reactions of the quinone produced (Pierpoint, W. S.) 567
Cholesterol and phospholipids in particulate fractions of adrenal medulla (Blaschko, H., Firemark, H., Smith, A. D. & Winkler, H.) 24P
Cholesterol, biosynthesis of, by the adipose tissue of rat, sheep and man (Durr, I. F.) 317
Cholesterol, conversion of 7-dehydrocholesterol into (Wilton, D. C., Akhtar, M. & Munday, K. A.) 29C
Cholesterol, effect of an inhibitor of the biosynthesis of, on the fatty acid composition of phospholipids in the serum and tissues of rats (Hill, P.) 696
Cholesterol in human semen (Eliasson, R.) 242
Cholesterol, role of the intestinal brush border in the absorption of, in rats (David J. S. K., Malathi, P. & Ganguly, J.) 662
Choline acetyltransferase of human placenta (Morris, D.) 754
Cholinesterase, erythrocyte, kinetics of inhibition of, by monomethylcarbamates (Reiner, E. & Simeon-Rudolf, V.) 501
Chondroitin sulphate–peptide complexes, β-xylosidases of animal and other sources in relation to the degradation of (Fisher, D., Higham, M., Kent, P. W. & Pritchard, P.) 46P
Chrysophanol, from *Phoma foveata* (Bick, I. R. C. & Rhee, C.) 112
Ciliary body, the tricarboxylic acid cycle and glycolysis in relation to ion transport by (Riley, M. V.) 898
Citrate and glucose metabolism, activities of some enzymes concerned with, in transplanted rat hepatomas (McLean, P. & Brown, J.) 874
Cobalt toxicity and iron metabolism in *Neurospora crassa* (Padmanaban, G. & Sarma, P. S.) 330
Collagen-fold formation in gelatin, effect of ultraviolet irradiation on (Cooper, D. R. & Davidson, R. J.) 655
Colpodia steinii, a substance rich in glutamic acid residues obtained from the cyst wall of (Tibbs, J.) 645
Copper oxidases, oxidation of thiols by (Bocks, S. M.) 9C
Corrin ring of vitamin B_{12}, biosynthesis of (Burnham, B. F. & Plane, R. A.) 13C
Corticosteroids, action of, on proteolysis (Bellamy, D. & Leonard, R. A.) 581
Cortisone, effect of, on rat-liver polyribosomes (Franklin, T. J. & Godfrey, A.) 513
Cupric ions, binding of, by ribonuclease (Saundry, R. H. & Stein, W. D.) 7P

Cycasin, methylation of nucleic acids *in vitro* by the aglycone (methylazoxymethanol) of (Matsumoto, H. & Higa, H. H.) 20C
Cycloheximide, effect of, on ribonucleic acid synthesis during the early action of thyroid hormones (Tata, J. R. & Widnell, C. C.) 604
Cyst wall of *Colpoda steinii*, a substance rich in glutamic acid residues obtained from (Tibbs, J.) 645
Cystamine and cysteamine, effects of, on the adenosine-triphosphatase activity and oxidative phosphorylation of rat-liver mitochondria (Skrede, S.) 702
Cysteic acid, incorporation of, into plant sulpholipid by *Euglena gracilis* (Davies, W. H., Mercer, E. I. & Goodwin, T. W.) 369
Cytidine 5′-diphosphate ethanolamine, the labelling of brain phospholipids by, *in vitro* (Ansell, G. B. & Metcalfe, R. F.) 22P
Cytochrome 552, electrophoretic and other studies on, from *Rhodopseudomonas palustris* (Henderson, R. W. & Nankiville, D. D.) 587
Cytochromoid, *c*, electrophoretic and other studies on, from *Rhodopseudomonas palustris* (Henderson, R. W. & Nankiville, D. D.) 587

7-Dehydro[26-^{14}C]cholesterol, chemical synthesis and biological oxidation of (Dean, P. D. G. & Whitehouse, M. W.) 410
7-Dehydrocholesterol, conversion of, into cholesterol (Wilton, D. C., Akhtar, M. & Munday, K. A.) 29C
5-Dehydroshikimate reductase, properties and distribution of, in the tea plant (*Camellia sinensis* L.) (Sanderson, G. W.) 248
3-Deoxy-2-oxo-6-phosphogluconate, formation of, by *Zymomonas mobilis* (Dawes, E. A., Ribbons, D. W. & Large, P. J.) 795
Deoxyribonuclease activity, heat-sensitive, in cells infected with herpes simplex virus (Morrison, J. M. & Keir, H. M.) 37C
Deoxyribonucleic acid and ribonucleic acid, cellular, relationship between, in the developing rat cerebral cortex (Adams, D. H.) 636
Deoxyribonucleic acid and ribonucleic acid, properties of a rat-liver nuclease hydrolysing (Curtis, P. J. & Smellie, R. M. S.) 818
Deoxyribonucleic acid and ribonucleic acid, purification from rat liver of a nuclease hydrolysing (Curtis, P. J., Burdon, M. G. & Smellie, R. M. S.) 813
Deoxyribonucleic acid, asymmetric transcription of, by deoxyribonucleic acid-dependent ribonucleic acid polymerase of Krebs II ascites-tumour cells (Shenkin, A. & Burdon, R. H.) 5C
Deoxyribonucleic acid, changes in, during the aerobic growth cycle of yeast (Polakis, E. S. & Bartley, W.) 883
Deoxyribonucleic acid, degradation of, by diphenylamine, and isolation of oligonucleotides (Burton, K.) 68
Deoxyribonucleic acid, fractionation of, from phage-infected bacteria (Smith, M. G. & Burton, K.) 229
Deoxyribonucleic acid, incorporation of thymidine into, in mouse fibroblasts infected with polyoma virus (Molteni, P., De Simone, V., Grosso, E., Bianchi, P. A. & Polli, E.) 78
Deoxyribonucleic acid, selective degradation of, with osmium tetroxide (Burton, K. & Riley, W. T.) 70
Deoxyribonucleic acid, transforming, fractionation of, from *Bacillus subtilis* (Ayad, S. R., Barker, G. R. & Jacob, A. E.) 3P
Deoxyribonucleic acid, uracil in formic acid hydrolysates of (Schein, A. H.) 311
1,2-Di-*O*-acylglycerols, preparation of (Gigg, J. & Gigg, R.) 24P
Diaphragm, isolated, some factors affecting the response of, to insulin (Manchester, K. L.) 711
2,6-Dichlorobenzonitrile and 2,6-dichlorothiobenzamide (Prefix), comparative metabolism of, in the dog and rat (Griffifths, M. H., Moss, J. A., Rose, J. A. & Hathway, D. E.) 770
2,6-Dichlorothiobenzamide (Prefix) and 2,6-dichlorobenzonitrile, comparative metabolism of, in the dog and rat (Griffiths, M. H., Moss, J. A., Rose, J. A. & Hathway, D. E.) 770
Diethyltin, dealkylation of, by the rat (Bridges, J. W., Davies, D. S. & Williams, R. T.) 14P
3,4′-Dihydroxyflavone, formation of, from flavone in the gunea pig (Das, N. P. & Griffiths, L. A.) 488
Di-isopropyl phosphorfluoridate, dealkylation of acetylcholinesterase inhibited by (Coult, D. B., Marsh, D. J. & Read, G.) 869
Dimethylaminoethanol and monomethylaminoethanol, incorporation of phosphate esters of, into the phospholipids of brain and liver (Ansell, G. B. & Chojnacki, T.) 303
4-Dimethylamino-3′-methylazobenzene, effect of, on ^{14}C-labelled amino acid incorporation by rat-liver polysome preparations (Hawtrey, A. O. & Nourse, L. D.) 682
2,4-Dinitrophenylamino acids, *R* values of, in certain column-chromatographic systems (Matheson, N. A. & Sheltawy, M.) 297
o-Diphenol oxidase, oxidation of chlorogenic acid by (Pierpoint, W. S.) 567
Diphenylamine, degradation of deoxyribonucleic acid by, and isolation of oligonucleotides (Burton, K.) 68
Diphosphoinositide, incorporation of [^{32}P]phosphate into, of subcellular fractions from young rat brain (Kai, M. & Hawthorne, J. N.) 62
Docosapentaenoic acid, changes in the concentration of, in the maturing rat testis (Davis, J. T., Bridges, R. B. & Coniglio, J. G.) 342

Eelworm, potato-root, hatching factor of (Clarke, A. J. & Widdowson, E.) 862
α-Elastin, antiserum to, and its use in the detection of soluble elastin in extracts of foetal ligaments (Jackson, D. S., Sandberg, L. S. & Cleary, E. G.) 13P
Emodin, from *Phoma foveata* (Bick, I. R. C. & Rhee, C.) 112
Enamel, bovine, mature, studies of the proteins, peptides and free amino acids of (Glimcher, M. J. & Levine, P. T.) 742
End-terminal analyses of finback-whale myoglobin (Atassi, M. Z. & Saplin, B. J.) 82
Entner–Doudoroff pathway of glucose metabolism in *Zymomonas mobilis* (Dawes, E. A., Ribbons, D. W. & Large, P. J.) 795
Enzyme patterns, changes in, in pathological conditions (Morgan, H. G.) 38P
Enzyme patterns, control of, in animal tissues (Krebs, H. A.) 37P
Enzyme patterns, control of, in plant tissues (Davies, D. D.) 37P
Enzyme patterns, control of, in yeast (Holzer, H.) 37P
Enzymes, dextran-gel filtration of, in the presence of their high-molecular-weight substrates (Auricchio, F. & Bruni, C. B.) 290
Enzymes, two-substrate, interpretation of non-hyperbolic rate curves for (Ferdinand, W.) 278
Epithelial mucopolysaccharides, action of neutral hypochlorite on (Roberts, G. P. & Gibbons, R. A.) 426
Epithelium, rumen, isolated, transport and metabolism of fatty acids by (Hird, F. J. R., Jackson, R. B. & Weidemann, M. J.) 394

Eremothecium ashbyii, precursors of the xylene ring in riboflavine in (Ali, S. N. & Al-Khalidi, U. A. S.) 182
Erythrocyte cholinesterase, kinetics of inhibition of, by monomethylcarbamates (Reiner, E. & Simeon-Rudolf, V.) 501
Escherichia coli, β-galactoside permease of, as a primary active-transport system (Kolber, J. & Stein, W. D.) 8P
Escherichia coli, phage-infected, fractionation of deoxyribonucleic acid from (Smith, M. G. & Burton, K.) 229
Escherichia coli, purification and properties of penicillinase whose synthesis is mediated by an R-factor in (Datta, N. & Richmond, M. H.) 204
Escherichia coli, puromycin-initiated release of soluble ribonucleic acid from ribosomes of (Cannon, M.) 5P
Escherichia coli, role of *p*-hydroxybenzoic acid in the metabolism of (Jones, R. G. W. & Lascelles, J.) 29P
Escherichia coli, secondary structure of transfer ribonucleic acid from, in solution (Cox, R. A.) 841
Ethanol, influence of the metabolism of, on the lactate/pyruvate ratio of rat-liver slices (Forsander, O. A.) 244
Ethanol, route of formation of, in *Zymomonas mobilis* (Dawes, E. A., Ribbons, D. W. & Large, P. J.) 795
Ethanolamine-containing phospholipids, catabolism of, in rat-brain preparations (Ansell, G. B. & Spanner, S.) 23P
Ethionine sulphur, entry of, into yeast protein (Maw, G. A.) 28P
γ-Ethylglutamic acid, chemical synthesis of (Fowden, L.) 57
γ-Ethylideneglutamic acid, isolation and metabolism of, in the tulip (Fowden, L.) 57
Euglena gracilis, biosynthesis of the plant sulpholipid by (Davies, W. H., Mercer, E. I. & Goodwin, T. W.) 369

Fat cells, isolated, effects of prolonged incubation of, on their response to hormones stimulating lipolysis and glucose metabolism (Galton, D. J. & Fain, J. N.) 557
Fatty acids, biosynthesis of methyl ketone precursors of, in bovine milk fat (Lawrence, R. C. & Hawke, J. C.) 25
Fatty acids, composition of, of plasma lipids of newborn and maternal ruminants (Leat, W. M. F.) 598
Fatty acids, effect of a cholesterol-biosynthesis inhibitor on the composition of, of phospholipids in the serum and tissues of rats (Hill, P.) 696
Fatty acids, effect of concentration of, on the respiration of isolated rumen epithelium (Hird, F. J. R., Jackson, R. B. & Weidemann, M. J.) 394
Fatty acids, effect of hexokinase and tricarboxylic acid-cycle intermediates on oxidation of, by rat-liver mitochondria (Hird, F. J. R., Symons, R. H. & Weidemann, M. J.) 389
Fatty acids, essential, effect of sex and gonadal hormones on rat plasma lipids during the development of a deficiency of (Lyman, R. L., Ostwald, R., Bouchard, P. & Shannon, A.) 438
Fatty acids, essential, turnovers of mitochondrial components of rats deficient in (Bailey, E., Taylor, C. B. & Bartley, W.) 39P
Fatty acids, polyunsaturated, changes in the concentrations of, in the maturing rat testis (Davis, J. T., Bridges, R. B. & Coniglio, J. G.) 342
Fatty acids, saturated. 1-^{14}C-labelled, metabolism of, in the silkworm (Sridhara, S., Ravi Rao, U. & Bhat, J. V.) 260
Fatty acids, short-chain, oxidative phosphorylation accompanying oxidation of, by rat-liver mitochondria (Hird, F. J. R. & Weidemann, M. J.) 378
Fatty acids, transport and metabolism of, by isolated rumen epithelium (Hird, F. J. R., Jackson, R. B. & Weidemann, M. J.) 394
Fatty acids, use of the ω-fluorine atom in the study of, containing ethyl *n*-propyl and isopropyl branches (Pattison, F. L. M. & Peters, D. A. V.) 689
Ferrimyoglobin, sperm-whale, absorption spectra of (Hanania, G. I. H., Yeghiayan, A. & Cameron, B. F.) 189
Ferrochelatase as lipoprotein in liver mitochondria and chromatophores (Mazanowska, A. M., Neuberger, A. & Tait, G. H.) 117
Fibroblasts, mouse, infected with polyoma virus, incorporation of thymidine into deoxyribonucleic acid in (Molteni, P., De Simone, V., Grosso, E., Bianchi, P. A. & Polli, E.) 78
Ficin chemically attached to carboxymethylcellulose, preparation and properties of (Hornby, W. E., Lilly, M. D. & Crook, E. M.) 420
Finback-whale myoglobin, preparation, physicochemical and immunochemical characterization, differentiation from sperm-whale myoglobin, amino acid composition and end-terminal analyses of (Atassi, M. Z. & Saplin, B. J.) 82
Flavan-3,4-diol, new, obtained from *Acacia auriculiformis* by paper ionophoresis (Drewes, S. E. & Roux, D. G.) 493
Flavone, metabolism of, in the guinea pig (Das, N. P. & Griffiths, L. A.) 488
ω-Fluorine atom, use of, in the study of the metabolism of fatty acids containing ethyl, *n*-propyl and isopropyl branches (Pattison, F. L. M. & Peters, D. A. V.) 689
p-Fluorophenylalanine, effect of, on interferon production in chick-embryo cells (Buchan, A. & Burke, D. C.) 530
5-Fluorouracil, effect of, on ribonucleic acid synthesis during the early action of thyroid hormones (Tata, J. R. & Widnell, C. C.) 604
Formaldehyde, reaction of, with catecholamine and tryptamine derivatives to give fluorescent products (Bell, C. E. & Somerville, A. R.) 1C
[^{14}C]Formate, incorporation of, into thiamine in yeast (Johnson, D. B., Howells, D. J. & Goodwin, T. W.) 30
N-Formylanthranilic acid as metabolite of indole in the rat (King, L. J., Parke, D. V. & Williams, R. T.) 266
Fructose diphosphatase and phosphofructokinase, effects of adenine nucleotides on, in the regulation of the direction of carbohydrate metabolism in pigeon-liver homogenates (Gevers, W. & Krebs, H. A.) 720
Fumigatin, formation of, from fumigatol in the medium of *Aspergillus fumigatus* (Packter, N. M.) 353
Fumigatol, conversion of [^{14}C]orsellinic acid and [^{14}C]-orcinol into, by *Aspergillus fumigatus* (Packter, N. M.) 353
6-Furfurylaminopurine, effect of, on senescence in tobacco-leaf tissue after harvest (Anderson, J. W. & Rowan, K. S.) 401

Galactokinase, pig-liver, purification and properties of (Ballard, F. J.) 347
β-Galactosidase, purification of, from ram testis (Caygill, J. C., Roston, C. P. J. & Jevons, F. R.) 405
β-Galactosidase, urinary, and kidney damage (Dance, N., Price, R. G. & Robinson, D.) 44P
β-Galactoside permease of *Escherichia coli* as a primary active-transport system (Kolber, J. & Stein, W. D.) 8P
Gangliosides, patterns of, in mental and neurological disorders (Svennerholm, L.) 20P
Gelatin derivatives, determination of the substitution achieved at the α-amino, ε-amino and imidazole groups of (Leach, A. A.) 506
Gelatin, effect of ultraviolet irradiation on collagen-fold formation in (Cooper, D. R. & Davidson, R. J.) 655
Genes, extrachromosomal, and enzyme synthesis in bacteria (Richmond, M. H.) 1P

Glucan, yeast, molecular structure of (Manners, D. J. & Patterson, J. C.) 19c
Glucose and citrate metabolism, activities of some enzymes concerned with, in transplanted rat hepatomas (McLean, P. & Brown, J.) 874
Glucose catabolism in the cotyledons of germinating pea seeds (Wray, J. L. & Brown, A. P.) 44p
Glucose, effects of prolonged incubation of isolated fat cells on their response to hormones stimulating metabolism of (Galton, D. J. & Fain, J. N.) 557
Glucose, formation of, from hexoses, pentoses, polyols and related substances in kidney cortex (Krebs, H. A. & Lund, P.) 210
Glucose, uptake of, and oxygen consumption by the skin of rats of various ages (Patnaik, B. K. & Kanungo, M. S.) 374
Glutamate dehydrogenase, conformational changes and the regulation of the activity of (Bayley, P. M. & Radda, G. K.) 105
Glutamate, distribution of, in subcellular fractions of guinea-pig brain (Mangan, J. L. & Whittaker, V. P.) 128
Glutamic acid residues, a substance rich in, obtained from the cyst wall of *Colpoda steinii* (Tibbs, J.) 645
L-Glutamine, formation of glycine from, in guinea-pig-liver slices (Evered, D. F. & Wass, M.) 30p
γ-Glutamylglutamate, distribution of, in subcellular fractions of guinea-pig brain (Mangan, J. L. & Whittaker, V. P.) 128
Glutathione *S*-alkyltransferase of the rat (Johnson, M. K.) 44
Glutathione as the predominant thiol in rat liver, evidence for (Johnson, M. K.) 38
Glutathione, reaction of, with iodomethane *in vivo* (Johnson, M. K.) 38
Glycerol dehydrogenase, nicotinamide–adenine dinucleotide phosphate-dependent, evidence for the presence of, in skeletal muscle (Toews, C. J.) 27c
Glycerol, evidence for the metabolism of, by skeletal muscle (Toews, C. J.) 27c
Glycine, formation of, from L-glutamine in guinea-pig-liver slices (Evered, D. F. & Wass, M.) 30p
Glycogen synthesis, effect of oxygen pressure on, by rat-liver slices (Figueroa, E., Vallejos, R., Pfeifer, A. & Kahler, C.) 253
Glycogens, human-liver, structure and deposition of (Bourne, E. J., McLean, A. & Pridham, J. B.) 678
Glycolipids, isolation and partial characterization of, of normal human leucocytes (Miras, C. J., Mantzos, J. D. & Levis, G. M.) 782
Glycolysis and the tricarboxylic acid cycle in relation to ion transport by the ciliary body (Riley, M. V.) 898
Glycopeptides in human urine (McGale, E. H. F. & Jevons, F. R.) 11p
Glycosidases, ram-testis, inhibition of, by mucopolysaccharides (Caygill, J. C.) 9p
Glyoxylate and 2-oxoglutarate, synergistic decarboxylation of, by an enzyme from mammalian liver (Stewart, P. R. & Quayle, J. R.) 43p
Golgi apparatus, a function of, in polysaccharide synthesis and transport in the root-cap cells of wheat (Northcote, D. H. & Pickett-Heaps, J. D.) 159
Gonadal hormones and sex, effect of, on rat plasma lipids during the development of an essential fatty acid deficiency (Lyman, R. L., Ostwald, R., Bouchard, P. & Shannon, A.) 438
Growth hormone, effects of prolonged incubation of isolated fat cells on their response to (Galton, D. J. & Fain, J. N.) 557
Growth hormone, thyroid hormone and testosterone, additive effects of, on deoxyribonucleic acid-dependent ribonucleic acid polymerase in rat-liver nuclei (Widnell, C. C. & Tata, J. R.) 621
Guanosine triphosphate, effect of, on the optical-rotatory-dispersion properties of glutamate dehydrogenase (Bayley, P. M. & Radda, G. K.) 105

Haem and zinc protoporphyrin, effect of lipids and organic solvents on the enzymic formation of (Mazanowska, A. M., Neuberger, A. & Tait, G. H.) 117
Hatching factor of the potato-root eelworm (Clarke, A. J. & Widdowson, E.) 862
Helianthus tuberosus L., *see* Artichoke
Heparin and related compounds, ^{35}S-labelled, metabolic fate of (Lloyd, A. G., Embery, G., Wusteman, F. S. & Dodgson, K. S.) 33p
[^{35}S]Heparin, *N*-desulphation of, by rat tissues (Lloyd, A. G., Embery, G., Powell, G. M., Curtis, C. G. & Dodgson, K. S.) 33p
Hepatomas, rat, transplanted, activities of some enzymes concerned with citrate and glucose metabolism in (McLean, P. & Brown, J.) 874
Herpes simplex virus, heat-sensitive deoxyribonuclease activity in cells infected with (Morrison, J. M. & Keir, H. M.) 37c
Hevea brasiliensis latex, formation of Δ^3-isopentenyl phosphate by (Chesterton, C. J. & Kekwick, R. G. O.) 26p
Hevea brasiliensis latex, isolation and composition of helical protein microfibrils from (Audley, B. G.) 335
Hevea brasiliensis latex, phosphomevalonate kinase from (Skilleter, D. N., Williamson, I. P. & Kekwick, R. G. O.) 27p
Hexokinase and tricarboxylic acid-cycle intermediates, effect of, on fatty acid oxidation and formation of ketone bodies by rat-liver mitochondria (Hird, F. J. R., Symons, R. H. & Weidemann, M. J.) 389
Hexoses, formation of glucose from, in kidney cortex (Krebs, H. A. & Lund, P.) 210
Histones from rat liver and thymus (Ord, M. G. & Stocken, L. A.) 5p
Histones, metabolic properties of, from rat liver and thymus gland (Ord, M. G. & Stocken, L. A.) 888
Histones of trout liver (Palau, J. & Butler, J. A. V.) 5p
Homocysteine, synthesis of methionine from, by extracts of *Salmonella typhimurium* (Cauthen, S. E., Foster, M. A. & Woods, D. D.) 630
Hopkins Memorial Lecture, The Fifth: Growth and organization (Szent-Györgyi, A.) 641
Hydrocortisone, effect of, and retinol on cultured limb-bone rudiments (Dingle, J. T., Fell, H. B. & Lucy, J. A.) 173
p-Hydroxybenzoic acid, role of, in the metabolism of *Escherichia coli* (Jones, R. G W. & Lascelles, J.) 29p
(±)-3β-Hydroxy[26-^{14}C]cholest-5-en-26-oic acid, chemical synthesis and biological oxidation of (Dean, P. D. G. & Whitehouse, M. W.) 410
7α-Hydroxy[26-^{14}C]cholesterol, chemical synthesis and biological oxidation of (Dean, P. D. G. & Whitehouse, M. W.) 410
26-Hydroxy[26-^{14}C]cholesterol, chemical synthesis and biological oxidation of (Dean, P. D. G. & Whitehouse, M. W.) 410
4′-Hydroxyflavone, formation of, from flavone in the guinea pig (Das, N. P. & Griffiths, L. A.) 488
5-Hydroxyoxindole as metabolite of indole in the rat (King, L. J., Parke, D. V. & Williams, R. T.) 266
3β-Hydroxypregn-5-en-20-one, formation of Δ^{16}-steroids *in vitro* from, by rat testis tissue (Ahmad, N. & Gower, D. B.) 25p
Hydroxypyridines, including compounds of the vitamin B_6 group, fluorescence studies on (Bridges, J. W., Davies, D. S. & Williams, R. T.) 451

Hypercholesterolaemia and liver enlargement in experimental hepatic porphyria (De Matteis, F.) 23C
Hypochlorite, neutral, action of, on epithelial mucopolysaccharides (Roberts, G. P. & Gibbons, R. A.) 426

Imidazole, α-amino and ε-amino groups of proteins, determination of the substitution achieved at, with special reference to derivatives of gelatin (Leach, A. A.) 506
Imidazole derivatives as uncouplers of oxidative phosphorylation (Beechey, R. B.) 284
Immunoglobulin G with long-acting thyroid-stimulating activity, proteolysis of (Dorrington, K. J., Carneiro, L. & Munro, D. S.) 858
[2-^{14}C]Indole, metabolism of, in the rat (King, L. J., Parke, D. V. & Williams, R. T.) 266
Indoxyl as metabolite of indole in the rat (King, L. J., Parke, D. V. & Williams, R. T.) 266
Insulin action on muscle, inhibition of, by rat serum and liver extracts (Young, D. A. B. & Benson, B.) 35P
Insulin, some factors affecting the response of muscle to (Manchester, K. L.) 711
Interferon, effect of puromycin and *p*-fluorophenylalanine on production of, in chick-embryo cells (Buchan, A. & Burke, D. C.) 530
Intestinal brush border, role of, in the absorption of cholesterol in rats (David, J. S. K., Malathi, P. & Ganguly, J.) 662
Iodide, transfer of, by the small intestine of the rat *in vitro* (Acland, J. D.) 45P
Iodoacetamide, reaction of, with xanthine oxidase (Bray, R. C. & Watts, D. C.) 142
Iodomethane, metabolism of, in the rat (Johnson, M. K.) 38
Ion transport by the ciliary body, the tricarboxylic acid cycle and glycolysis in relation to (Riley, M. V.) 898
Iron metabolism and cobalt toxicity in *Neurospora crassa* (Padmanaban, G. & Sarma, P. S.) 330
Isatin as metabolite of indole in the rat (King, L. J., Parke, D. V. & Williams, R. T.) 266
Δ^3-Isopentenyl phosphate, formation of, by *Hevea brasiliensis* latex (Chesterton, C. J. & Kekwick, R. G. O.) 26P
Isovitamins D_2 and D_3 as intermediates in the differentiation and assay of vitamins D_2 and D_3 by gas–liquid chromatography (Murray, T. K., Day, K. C. & Kodicek, E.) 293

Keratin, biosynthesis of high-sulphur proteins in (Gillespie, J. M. & Reis, P. J.) 669
Ketone bodies, effect of hexokinase and tricarboxylic acid-cycle intermediates on formation of, by rat-liver mitochondria (Hird, F. J. R., Symons, R. H. & Weidemann, M. J.) 389
Ketone bodies, production of, by rumen epithelium (Hird, F. J. R., Jackson, R. B. & Weidemann, M. J.) 394
Kidney cortex, formation of glucose from hexoses, pentoses, polyols and related substances in (Krebs, H. A. & Lund, P.) 210
Kidney, rat, influence of vitamin A status on the proteolytic activity of extracts of (Dingle, J. T., Sharman, I. M. & Moore, T.) 476
Kinetin, effect of, on senescence of tobacco-leaf tissue after harvest (Anderson, J. W. & Rowan, K. S.) 401
Krebs II ascites-tumour cells, asymmetric transcription of deoxyribonucleic acid by deoxyribonucleic acid-dependent ribonucleic acid polymerase of (Shenkin, A. & Burdon, R. H.) 5C
Krebs II mouse ascites-tumour cells, factors controlling amino acid incorporation by ribosomes from (Kerr, I. M., Cohen, N. & Work, T. S.) 826

Laccase, oxidation of thiols by (Bocks, S. M.) 9C
Lactate/pyruvate ratio, influence of the metabolism of ethanol on, of rat-liver slices (Forsander, O. A.) 244
Latex, *Hevea brasiliensis*, isolation and composition of helical protein microfibrils from (Audley, B. G.) 335
Lecithin, hydrolysis of unimolecular films of, with phospholipase A (Dawson, R. M. C.) 35C
Leucocytes, human, isolation and partial characterization of glycolipids of (Miras, C. J., Mantzos, J. D. & Levis, G. M.) 782
Levan, formation of, by *Zymomonas mobilis* (Dawes, E. A., Ribbons, D. W. & Rees, D. A.) 804
α-Linolenic acid, biohydrogenation of, by rumen microorganisms (Wilde, P. F. & Dawson, R. M. C.) 469
Lipid content during metamorphosis of the blowfly (*Lucilia cuprina*), changes in (D'Costa, M. A. & Birt, L. M.) 42P
Lipids and membrane phenomena in neural systems (Gammack, D. B.) 18P
Lipids and organic solvents, effect of, on the enzymic formation of zinc protoporphyrin and haem (Mazanowska, A.M., Neuberger, A. & Tait, G. H.) 117
Lipids, biosynthesis of methyl ketone precursors of, in bovine milk fat (Lawrence, R. C. & Hawke, J. C.) 25
Lipids, changes in the composition of, in the maturing rat testis (Davis, J. T., Bridges, R. B. & Coniglio, J. G.) 342
Lipids, metabolism of, in relation to brain structure (Davison, A. N.) 17P
Lipids of isolated neurons, thin-layer chromatography of (Johnston, P. V. & Roots, B. I.) 157
Lipids, plasma, fatty acid composition of, of newborn and maternal ruminants (Leat, W. M. F.) 598
Lipids, plasma, rat, effect of sex and gonadal hormones on, during development of an essential fatty acid deficiency (Lyman, R. L., Ostwald, R., Bouchard, P. & Shannon, A.) 438
Lipids, structural aspects of, in membrane function (Van Deenen, L. L. M., Van Golde, L. M. G. & Demel, R. A.) 17P
Lipolysis, effects of prolonged incubation of isolated fat cells on their response to hormones stimulating (Galton, D. J. & Fain, J. N.) 557
Lipopolysaccharides of *Shigella flexneri*, quantitative analysis of the monosaccharide constituents of (Simmons, D. A. R.) 903
Liver, human, structure and deposition of glycogens in (Bourne, E. J., McLean, A. & Pridham, J. B.) 678
Lipoproteins, serum, investigation of, and of their contribution to milk fat in the dairy cow (Glascock, R. F., Welch, V. A., Bishop, C., Davies, T., Wright, E. W. & Noble, R. C.) 149
Liver, biological sulphation of L-tyrosyl peptides in (Jones, J. G., Scotland, S. M. & Dodgson, K. S.) 138
Liver, concentration and biosynthesis of nicotinamide nucleotides in, of rats treated with carcinogens (Clark, J. B., Greenbaum, A. L. & McLean, P.) 546
Liver enlargement and hypercholesterolaemia in experimental hepatic porphyria (De Matteis, F.) 23C
Liver, enzyme-catalysed reaction of glutathione with alkyl halides in (Johnson, M. K.) 44
Liver, enzyme-catalysed reaction of glutathione with iodomethane in (Johnson, M. K.) 38
Liver, incorporation of the phosphate esters of *N*-substituted aminoethanols into phospholipids of (Ansell, G.B. & Chojnacki, T.) 303
Liver mitochondria, rat, the rate-limiting step in the oxidation of palmitate or palmitoyl-coenzyme A by (Shepherd, D., Yates, D. W. & Garland, P. B.) 3C
Liver, pig, purification and properties of galactokinase from (Ballard, F. J.) 347
Liver, pigeon, effects of adenine nucleotides on carbohydrate metabolism in homogenates of (Gevers, W. & Krebs, H. A.) 720

Liver, rat, additive effects of thyroid hormone, growth hormone and testosterone on deoxyribonucleic acid-dependent ribonucleic acid polymerase in nuclei of (Widnell, C. C. & Tata, J. R.) 621
Liver, rat, effect of 4-dimethylamino-3′-methylazobenzene on ^{14}C-labelled amino acid incorporation by polysome preparations from (Hawtrey, A. O. & Nourse, L. D.) 682
Liver, rat, effect of hexokinase and tricarboxylic acid-cycle intermediates on fatty acid oxidation and formation of ketone bodies by mitochondria of (Hird, F. J. R., Symons, R. H. & Weidemann, M. J.) 389
Liver, rat, effect of oxygen pressure on glycogen synthesis by slices of (Figueroa, E., Vallejos, R., Pfeifer, A. & Kahler, C.) 253
Liver, rat, effect of the stage of vitamin A deficiency on sulphate activation in (Subba Rao, K. & Ganguly, J.) 693
Liver, rat, effects of cystamine and cysteamine on the adenosine-triphosphatase activity and oxidative phosphorylation of mitochondria of (Skrede, S.) 702
Liver, rat, enzymic hydrolysis of sphingomyelin by (Heller, M. & Shapiro, B.) 763
Liver, rat, histones of (Ord, M. G. & Stocken, L. A.) 5P
Liver, rat, influence of the metabolism of ethanol on the lactate/pyruvate ratio of slices of (Forsander, O. A.) 244
Liver, rat, influence of vitamin A status on the proteolytic activity of extracts of (Dingle, J. T., Sharman, I. M. & Moore, T.) 476
Liver, rat, metabolic properties of histones from (Ord, M. G. & Stocken, L. A.) 888
Liver, rat, metabolism of 3-methylcholanthrene and some related compounds by homogenates of (Sims, P.) 215
Liver, rat, oxidative phosphorylation accompanying oxidation of short-chain fatty acids by mitochondria of (Hird, F. J. R. & Weidemann, M. J.) 378
Liver, rat, polyribosomes in preparations of (Franklin, T. J. & Godfrey, A.) 513
Liver, rat, properties of a nuclease hydrolysing ribonucleic acid and deoxyribonucleic acid from (Curtis, P. J. & Smellie, R. M. S.) 818
Liver, rat, purification of a nuclease hydrolysing ribonucleic acid and deoxyribonucleic acid from (Curtis, P. J., Burdon, M. G. & Smellie, R. M. S.) 813
Liver, trout, histones of (Palau, J. & Butler, J. A. V.) 5P
Lucilia cuprina, *see* Blowfly
Lymph nodes, regional, of specific-pathogen-free rats, changes in, after injection of dead tubercle bacilli suspended in mineral oil into the hind foot pad (Franklin, T. J.) 9P
Lysine, determination of, as the dinitrophenyl derivative (Matheson, N. A. & Sheltawy, M.) 297
Lysolecithin-solubilized membrane systems, inhomogeneity of (Gent, W. L. G. & Gregson, N. A.) 27P
Lysosomes, extracellular release of enzymes of, in response to sucrose (Fell, H. B. & Dingle, J. T.) 40P
Lysosomes, rat-liver and rat-kidney, influence of vitamin A status on the proteolytic activity of (Dingle, J. T., Sharman, I. M. & Moore, T.) 476
Lysosomes, rat-liver, nature of the collagenolytic activity of (Wynn, C. H. & Wahid, M. A.) 10P
Lysosomes, rat-skin, isolation of, and a comparison with liver and spleen lysosomes (Wynn, C. H. & Iqbal, M.) 10P

Magnesium and beryllium, competition of, from phosphoglucomutase (Aldridge, W. N. & Thomas, M.) 100
Membrane function, some structural aspects of lipids in (Van Deenen, L. L. M., Van Golde, L. M. G. & Demel, R. A.) 17P
Membrane phenomena and lipids in neural systems (Gammack, D. B.) 18P
Membrane systems, lysolecithin-solubilized, inhomogeneity of (Gent, W. L. G. & Gregson, N. A.) 27P
L-[*Me*-^{14}C]Methionine in biosynthesis of 3-*O*-methyl-D-mannose (Candy, D. J. & Baddiley, J.) 15
[*Me*-^{14}C,^{35}S]Methionine, incorporation of, into thiamine in yeast (Johnson, D. B., Howells, D. J. & Goodwin, T. W.) 30
Methionine, synthesis of, by extracts of *Salmonella typhimurium* (Cauthen, S. E., Foster, M. A. & Woods, D. D.) 630
Methoxy-6-sulphanilamidopyrimidines, species differences in the metabolism of (Bridges, J. W., Kibby, M. R. & Williams, R. T.) 14P
Methyl iodide, *see* Iodomethane
Methyl ketones, incorporation of [1-^{14}C]acetate into, that occur in steam-distillates of bovine milk fat (Lawrence, R. C. & Hawke, J. C.) 25
3-*O*-Methyl-D-mannitol obtained by reduction of 3-*O*-methyl-D-mannose (Candy, D. J. & Baddiley, J.) 15
3-*O*-Methyl-D-mannose from *Streptomyces griseus* (Candy, D. J. & Baddiley, J.) 15
Methylazoxymethanol (aglycone of cycasin), methylation of nucleic acids *in vitro* by (Matsumoto, H. & Higa, H. H.) 20C
3-Methylcholanthrene, metabolism of, by rat-liver homogenates (Sims, P.) 215
3-Methylcholanthrylene, metabolism of, by rat-liver homogenates (Sims, P.) 215
Mevalonic acid as intermediate in the biosynthesis of squalene and sterols by the adipose tissue of rat, sheep and man (Durr, I. F.) 317
*Micro-organisms, physiological and metabolic differentiation in (Malek, I.) 3P
Milk fat, bovine, incorporation of [1-^{14}C]acetate into the methyl ketones that occur in steam-distillates of (Lawrence, R. C. & Hawke, J. C.) 25
Milk fat, contribution of serum lipoproteins to, in the dairy cow (Glascock, R. F., Welch, V. A., Bishop, C., Davies, T., Wright, E. W. & Noble, R. C.) 149
Mitochondria, rat-brain, metabolism of sulphatide in (Davison, A. N. & Gregson, N. A.) 915
Mitochondria, rat-liver, effect of hexokinase and tricarboxylic acid-cycle intermediates on fatty acid oxidation and formation of ketone bodies by (Hird, F. J. R., Symons, R. H. & Weidemann, M. J.) 389
Mitochondria, rat-liver, effects of cystamine and cysteamine on the adenosine-triphosphatase activity and oxidative phosphorylation of (Skrede, S.) 702
Mitochondria, rat-liver, oxidative phosphorylation accompanying oxidation of short-chain fatty acids by (Hird, F. J. R. & Weidemann, M. J.) 378
Mitochondria, rat-liver, properties of a nuclease hydrolysing ribonucleic acid and deoxyribonucleic acid from (Curtis, P. J. & Smellie, R. M. S.) 818
Mitochondria, rat-liver, purification of a nuclease hydrolysing ribonucleic acid and deoxyribonucleic acid from (Curtis, P. J., Burdon, M. G. & Smellie, R. M. S.) 813
Mitochondria, rat-liver, the rate-limiting step in the oxidation of palmitate or palmitoyl-coenzyme A by (Shepherd, D., Yates, D. W. & Garland, P. B.) 3C
Mitochondrial components of normal and essential fatty acid-deficient rats, turnovers of (Bailey, E., Taylor, C. B. & Bartley, W.) 39P
5,6-Mono-*O*-cyclohexylidene-L-ascorbic acid used as an intermediate for synthesis of [^{14}C]vitamin C (Von Schuching, S. L. & Frye, G. H.) 652
Monomethylaminoethanol and dimethylaminoethanol, incorporation of phosphate esters of, into the phospholipids of brain and liver (Ansell, G. B. & Chojnacki, T.) 303

Monomethylcarbamates, kinetics of inhibition of erythrocyte cholinesterase by (Reiner, E. & Simeon-Rudolf, V.) 501
Monosaccharide constituents of *Shigella flexneri* lipopolysaccharides, quantitative analysis of (Simmons, D. A. R.) 903
Moulds, development of secondary biosynthesis in (Bu'Lock, J. D.) 2P
Mucin, hypobranchial, the polysaccharide sulphate component of, from the whelk (*Buccinum undatum* L.) (Hunt, S. & Jevons, F. R.) 522
Mucopolysaccharides, epithelial, action of neutral hypochlorite on (Roberts, G. P. & Gibbons, R. A.) 426
Mucopolysaccharides, inhibition of ram-testis glycosidases by (Caygill, J. C.) 9P
Mucoprotein carbohydrate, degradation of (Langley, T. J. & Jevons, F. R.) 12P
Mucoprotein, inhibition of biosynthesis of, in the sheep colonic mucosa *in vitro* by salicylic acid (Allen, A. & Kent, P. W.) 13P
Muscle, skeletal, evidence for the metabolism of glycerol by, and the presence of a nicotinamide–adenine dinucleotide phosphate-dependent glycerol dehydrogenase (Toews, C. J.) 27C
Muscle, skeletal, isolation and properties of a basic protein from the sarcoplasm of (Scopes, R. K.) 193
Muscle, some factors affecting the response of, to insulin (Manchester, K. L.) 711
Mycobacterium tuberculosis $H_{37}R_V$, biosynthesis of nucleic acid purines in (Malathi, V. G. & Ramakrishnan, T.) 594
Myelin, rat-brain, metabolism of sulpholipids in (Davison, A. N. & Gregson, N. A.) 915
Myoglobin, camel, preparation and properties of (Awad, E. S. & Kotite, L.) 909
Myoglobin, finback-whale, preparation, physicochemical and immunochemical characterization, differentiation from sperm-whale myoglobin, amino acid composition and end-terminal analyses of (Atassi, M. Z. & Saplin, B. J.) 82

1,8-Naphthalic acid, anhydride of, in urine of rats dosed with *cis-* and *trans*-acenaphthene-1,2-diol (Hopkins, R. P. & Young, L.) 19
Neuraminidase, alteration in the electrophoretic mobility of alkaline phosphatases after treatment with (Moss, D. W., Eaton, R. H., Smith, J. K. & Whitby, L. G.) 32C
Neurons, presence of phosphatidylcholine in, isolated from the lateral vestibular nucleus of ox brain (Johnston, P. V. & Roots, B. I.) 157
Neurospora crassa, cobalt toxicity and iron metabolism in (Padmanaban, G. & Sarma, P. S.) 330
Nicotinamide–adenine dinucleotide, reduced, effect of, on the optical-rotatory-dispersion properties of glutamate dehydrogenase (Bayley, P. M. & Radda, G. K.) 105
Nicotinamide–adenine nucleotides during the life cycle of the blowfly (*Lucilia cuprina*) (Birt, L. M.) 41P
Nicotinamide nucleotides, concentration and biosynthesis of, in livers of rats treated with carcinogens (Clark, J. B., Greenbaum, A. L. & McLean, P.) 546
p-Nitrobenzoic acid, metabolism of, in arachnids (Hitchcock, M. & Smith, J. N.) 736
Nitrogenous constituents, non-protein, of the maternal blood and foetal body fluids in the sheep (Huggett, A. St. G. & Slater, J. S.) 43P
Nuclease, rat-liver, hydrolysing ribonucleic acid and deoxyribonucleic acid, properties of (Curtis, P. J. & Smellie, R. M. S.) 818
Nuclease, rat-liver, hydrolysing ribonucleic acid and deoxyribonucleic acid, purification of (Curtis, P. J., Burdon, M. G. & Smellie, R. M. S.) 813
Nuclei, rat-liver, additive effects of thyroid hormone, growth hormone and testosterone on deoxyribonucleic acid-dependent ribonucleic acid polymerase in (Widnell, C. C. & Tata, J. R.) 621
Nucleic acid purines, biosynthesis of, in *Mycobacterium tuberculosis* $H_{37}R_V$ (Malathi, V. G. & Ramakrishnan, T.) 594
Nucleic acids, cellular, relationship between, in the developing rat cerebral cortex (Adams, D. H.) 636
Nucleic acids of senescent bean leaves (Wood, A. & Bradbeer, J. W.) 32P
Nucleic acids, methylation of, *in vitro* by methylazoxymethanol (aglycone of cycasin) (Matsumoto, H. & Higa, H. H.) 20C

Oleic acid, biohydrogenation of, by rumen micro-organisms (Wilde, P. F. & Dawson, R. M. C.) 469
Oligodeoxynucleotides, isolation of, from degraded deoxyribonucleic acid (Burton, K.) 68
Oligodeoxynucleotides, selective degradation of, with osmium tetroxide (Burton, K. & Riley, W. T.) 70
Orcinol, conversion of, into fumigatol by *Aspergillus fumigatus* (Packter, N. M.) 353
Orotic acid, incorporation of, into nucleic acids of rat cerebral cortex (Adams, D. H.) 636
[^{14}C]Orotic acid, incorporation of, into thiamine in yeast (Johnson, D. B., Howells, D. J. & Goodwin, T. W.) 30
Orsellinic acid, conversion of, into fumigatol by *Aspergillus fumigatus* (Packter, N. M.) 353
Osmium tetroxide, selective degradation of thymidine and thymine deoxynucleotides with (Burton, K. & Riley, W. T.) 70
Oxindole as metabolite of indole in the rat (King, L. J., Parke, D. V. & Williams, R. T.) 266
2-Oxoglutarate and glyoxylate, synergistic decarboxylation of, by an enzyme from mammalian liver (Stewart, P. R. & Quayle, J. R.) 43P
Oxygen, consumption of, and uptake of glucose by the skin of rats of various ages (Patnaik, B. K. & Kanungo, M. S.) 374
Oxygen consumption of isolated pancreatic islets of mice studied with the Cartesian-diver micro-gasometer (Hellerström, C.) 7C
Oxygen pressure, effect of, on glycogen synthesis by rat-liver slices (Figueroa, E., Vallejos, R., Pfeifer, A. & Kahler, C.) 253

Pachybasin from *Phoma foveata* (Bick, I. R. C. & Rhee, C.) 112
Palmitate and palmitoyl-coenzyme A, rate-limiting step in the oxidation of, by rat-liver mitochondria (Shepherd, D., Yates, D. W. & Garland, P. B.) 3C
Pancreatic islets, isolated, oxygen consumption of, studied with the Cartesian-diver micro-gasometer (Hellerström, C.) 7C
Pea seeds, germinating, glucose catabolism in the cotyledons of (Wray, J. L. & Brown, A. P.) 44P
Pectic substances, a function of the Golgi apparatus in synthesis and transport of, in the root-cap cells of wheat (Northcote, D. H. & Pickett-Heaps, J. D.) 159
Penicillinase, purification and properties of, whose synthesis is mediated by an R-factor in *Escherichia coli* (Datta, N. & Richmond, M. H.) 204
Penicillinase, relation of cephalosporinase to, in *Bacillus cereus* 569 (Sabath, L. D. & Abraham, E. P.) 11C
Pentoses, formation of glucose from, in kidney cortex (Krebs, H. A. & Lund, P.) 210
Pepsin and pepsins B, C and D, isolation of, from gastric contents of pigs (Ryle, A. P.) 485
Peptide–chondroitin sulphate complexes, β-xylosidases of animal and other sources in relation to the degradation

of (Fisher, D., Higham, M., Kent, P. W. & Pritchard, P.) 46P
Peptides, proteins and free amino acids of mature bovine enamel, studies of (Glimcher, M. J. & Levine, P. T.) 742
Peptides, small, use of acrylonitrile for the subtractive identification of the *N*-terminal residues of (Fletcher, J. C.) 34C
Phage-infected bacteria, fractionation of deoxyribonucleic acid from (Smith, M. G. & Burton, K). 229
Phenylalanine, effect of castration on incorporation of, into microsomal protein in an experimental prostatic tumour (Mainwaring, W. I. P. & Williams, D. C.) 836
Phoma foveata Foister, anthraquinone pigments from (Bick, I. R. C. & Rhee, C.) 112
Phomarin from *Phoma foveata* (Bick, I. R. C. & Rhee, C.) 112
Phosphatase activity of phosphoglyceromutase (Zwaig, N. & Milstein, C.) 360
Phosphatase, alkaline, inhibition of, by beryllium (Thomas, M. & Aldridge, W. N.) 94
Phosphatases, alkaline, alteration in the electrophoretic mobility of, after treatment with neuraminidase (Moss, D. W., Eaton, R. H., Smith, J. K. & Whitby, L. G.) 32C
Phosphate esters of *N*-substituted aminoethanols incorporated into the phospholipids of brain and liver (Ansell, G. B. & Chojnacki, T.) 303
[^{32}P]Phosphate, incorporation of, into the phosphoinositides of subcellular fractions from young rat brain (Kai, M. & Hawthorne, J. N.) 62
Phosphatidylcholine, presence of, in neurons isolated from the lateral vestibular nucleus of ox brain (Johnston, P. V. & Roots, B. I.) 157
Phosphatidylethanolamine, hydrolysis of unimolecular films of, with phospholipase A (Dawson, R. M. C.) 35C
Phosphatidylinositol, hydrolysis of unimolecular films of, with phospholipase A (Dawson, R. M. C.) 35C
Phosphatidylinositol, incorporation of [^{32}P]phosphate into, of subcellular fractions from young rat brain (Kai, M. & Hawthorne, J. N.) 62
Phosphofructokinase, a possible two-pathway mechanism for (Ferdinand, W.) 278
Phosphofructokinase and fructose diphosphatase, effects of adenine nucleotides on, in the regulation of the direction of carbohydrate metabolism in pigeon-liver homogenates (Gevers, W. & Krebs, H. A.) 720
Phosphoglucomutase, inhibition of, by beryllium (Thomas, M. & Aldridge, W. N.) 94
Phosphoglucomutase, kinetics of inhibition of, by beryllium (Aldridge, W. N. & Thomas, M.) 100
Phosphoglyceromutase reaction, the phosphorylated intermediate in (Zwaig, N. & Milstein, C.) 360
Phosphoinositides, incorporation of [^{32}P]phosphate into, of subcellular fractions from young rat brain (Kai, M. & Hawthorne, J. N.) 62
Phosphoinositides of nervous tissue (Dawson, R. M. C.) 19P
Phospholipase A (*Naja naja* venom), hydrolysis of unimolecular films of ^{32}P-labelled lecithin, phosphatidylethanolamine and phosphatidylinositol with (Dawson, R. M. C.) 35C
Phospholipase C, enzymic hydrolysis of sphingomyelin by, in rat liver (Heller, M. & Shapiro, B.) 763
Phospholipids and cholesterol in particulate fractions of adrenal medulla (Blaschko, H., Firemark, H., Smith, A. D. & Winkler, H.) 24P
Phospholipids, brain, labelling of, by cytidine 5′-diphosphate ethanolamine *in vitro* (Ansell, G. B. & Metcalfe, R. F.) 22P
Phospholipids, breakdown of, in the central nervous system (Webster, G. R.) 19P
Phospholipids, changes in the composition of, in the maturing rat testis (Davis, J. T., Bridges, R. B. & Coniglio, J. G.) 342
Phospholipids, effect of a cholesterol-biosynthesis inhibitor on the fatty acid composition of, in the serum and tissues of rats (Hill, P.) 696
Phospholipids, ethanolamine-containing, catabolism of, in rat-brain preparations (Ansell, G. B. & Spanner, S.) 23P
Phospholipids, incorporation of the phosphate esters of *N*-substituted aminoethanols into, of brain and liver (Ansell, G. B. & Chojnacki, T.) 303
Phosphomevalonate kinase from *Hevea brasiliensis* latex (Skilleter, D. N., Williamson, I. P. & Kekwick, R. G. O.) 27P
Phosphorylation, oxidative, accompanying oxidation of short-chain fatty acids by rat-liver mitochondria (Hird, F. J. R. & Weidemann, M. J.) 378
Phosphorylation, oxidative, effects of cystamine and cysteamine on, of rat-liver mitochondria (Skrede, S.) 702
Phosphorylation, respiratory-chain, uncoupling of, by substituted imidazoles and benzimidazoles (Beechey, R. B.) 284
Photophosphorylation, bacterial, synthesis and possible character of a high-energy intermediate in (Horio, T., Nishikawa, K. & Yamashita, J.) 321
Pisum arvense, ribosomal particles of (Barker, G. R. & Rieber, M.) 4P
Pithomyces sacchari (Speg.) M. B. Ellis, isolation of angolide from (Riches, P. & Russell, D. W.) 8P
Placenta, human, choline acetyltransferase of (Morris, D.) 754
Plant tissues, synthesis of adenosine 5′-phosphate in (Hatch, M. D.) 198
Plasma lipids, fatty acid composition of, of newborn and maternal ruminants (Leat, W. M. F.) 598
Plasma lipids, rat, effect of sex and gonadal hormones on, during development of an essential fatty acid deficiency (Lyman, R. L., Ostwald, R., Bouchard, P. & Shannon, A.) 438
Policy of the journal and instructions to authors 1
Polyols, formation of glucose from, in kidney cortex (Krebs, H. A. & Lund, P.) 210
Polyoma virus, incorporation of thymidine into deoxyribonucleic acid in mouse fibroblasts infected with (Molteni, P., De Simone, V., Grosso, E., Bianchi, P. A. & Polli, E.) 78
Polyphosphoinositides, synthesis of, by rat brain *in vitro* (Kai, M. & Hawthorne, J. N.) 23P
Polyribosomes in rat-liver preparations (Franklin, T. J. & Godfrey, A.) 513
Polysaccharide sulphate, characterization of, from the hypobranchial mucin of the whelk (*Buccinum undatum* L.) 522
Polysaccharides, a function of the Golgi apparatus in synthesis and transport of, in the root-cap cells of wheat (Northcote, D. H. & Pickett-Heaps, J. D.) 159
Polysomes, rat-liver, effect of 4-dimethylamino-3′-methylazobenzene on ^{14}C-labelled amino acid incorporation by preparations of (Hawtrey, A. O. & Nourse, L. D.) 682
Porphyria, hepatic, experimental, hypercholesterolaemia and liver enlargement in (De Matteis, F.) 23C
Porphyrinogens as biosynthetic intermediates of cobamides (Burnham, B. F. & Plane, R. A.) 13C
Potato-root eelworm, hatching factor of (Clarke, A. J. & Widdowson, E.) 862
Prefix, *see* 2,6-Dichlorothiobenzamide
Progesterone, isolation of, from human pregnancy urine (Ismail, A. A. A. & Harkness, R. A.) 15P

Promine (growth promoter) found in various cells (Szent-Györgyi, A.) 641
Prostate gland, cholesterol in human semen secreted by (Eliasson, R.) 242
Prostate gland, human and canine, metabolism of [4-^{14}C]-testosterone by (Aliapoulios, M. A., Chamberlain, J., Jagarinec, N. & Ofner, P.) 15P
Prostatic tumour, experimental, effect of castration on the ribonucleic acid metabolism of (Mainwaring, W. I. P. & Williams, D. C.) 836
Proteases, connective-tissue, inhibition of, by antimalarial and antirheumatic drugs (Whitehouse, M. W. & Cowey, F. K.) 11P
Proteases, minor, in the stomach of the pig (Ryle, A. P.) 485
Protein, basic, isolation and properties of, from skeletal-muscle sarcoplasm (Scopes, R. K.) 193
Protein, changes in, during the aerobic growth cycle of yeast (Polakis, E. S. & Bartley, W.) 883
Protein microfibrils, helical, isolation and composition of, from *Hevea brasiliensis* latex (Audley, B. G.) 335
Protein synthesis, factors controlling, by ribosomes from Krebs II mouse ascites-tumour cells (Kerr, I. M., Cohen, N. & Work, T. S.) 826
Protein, yeast, entry of ethionine sulphur into (Maw, G. A.) 28P
Proteins, determination of the substitution achieved at the α-amino, ε-amino and imidazole groups of, with special reference to derivatives of gelatin (Leach, A. A.) 506
Proteins, oxidative cleavage of, by neutral hypochlorite (Roberts, G. P. & Gibbons, R. A.) 426
Proteins, peptides and free amino acids of mature bovine enamel, studies of (Glimcher, M. J. & Levine, P. T.) 742
Proteins, wool, high-sulphur, dietary-regulated biosynthesis of (Gillespie, J. M. & Reis, P. J.) 669
Proteolysis, action of corticosteroids on (Bellamy, D. & Leonard, R. A.) 581
Protoplast membrane, *Bacillus megaterium*, isolation and analysis of (Yudkin, M. D.) 923
Puromycin, effect of, on interferon production in chick-embryo cells (Buchan, A. & Burke, D. C.) 530
Puromycin, effect of, on rat-liver polyribosomes (Franklin, T. J. & Godfrey, A.) 513
Puromycin, effect of, on ribonucleic acid synthesis during the early action of thyroid hormones (Tata, J. R. & Widnell, C. C.) 604
Puromycin-initiated release of soluble ribonucleic acid from ribosomes of *Escherichia coli* (Cannon, M.) 5P
Pyridoxine compounds, fluorescence studies on (Bridges, J. W., Davies, D. S. & Williams, R. T.) 451
Pyruvate/lactate ratio, influence of the metabolism of ethanol on, of rat-liver slices (Forsander, O. A.) 244

Quinone, some reactions of, produced by the enzymic oxidation of chlorogenic acid (Pierpoint, W. S.) 567

Reticulocytes, rabbit, secondary structure of ribosomal ribonucleic acid from, in solution (Cox, R. A.) 841
Retine (growth inhibitor) found in various cells (Szent-Györgyi, A.) 641
Retinol, effect of, and hydrocortisone on cultured limb-bone rudiments (Dingle, J. T., Fell, H. B. & Lucy, J. A.) 173
Rhodopseudomonas palustris, electrophoretic and other studies on cytochrome 552 and cytochromoid *c* from (Henderson, R. W. & Nankiville, D. D.) 587
Rhodospirillum rubrum, synthesis and possible character of a high-energy intermediate in photophosphorylation in (Horio, T., Nishikawa, K. & Yamashita, J.) 321
Riboflavine, precursors of the xylene ring in (Ali, S. N. & Al-Khalidi, U. A. S.) 182
Ribonuclease, binding of cupric ions by (Saundry, R. H. & Stein, W. D.) 7P
Ribonuclease, dextran-gel filtration of, in the presence of high-molecular-weight substrate (Auricchio, F. & Bruni, C. B.) 290
Ribonuclease inhibitor, characterization of, in supernatant fraction of rat adrenals (Girija, N. S. & Sreenivasan, A.) 562
Ribonucleases, characterization of, in subcellular fractions from rat adrenals (Girija, N. S. & Sreenivasan, A.) 562
Ribonucleases of *Staphylococcus aureus* (strain Duncan) (Barker, G. R. & Pavlik, J. G.) 4P
Ribonucleic acid and deoxyribonucleic acid, cellular, relationship between, in the developing rat cerebral cortex (Adams, D. H.) 636
Ribonucleic acid and deoxyribonucleic acid, properties of a rat-liver nuclease hydrolysing (Curtis, P. J. & Smellie, R. M. S.) 818
Ribonucleic acid and deoxyribonucleic acid, purification from rat liver of a nuclease hydrolysing (Curtis, P. J., Burdon, M. G. & Smellie, R. M. S.) 813
Ribonucleic acid, changes in, during the aerobic growth cycle of yeast (Polakis, E. S. & Bartley, W.) 883
Ribonucleic acid metabolism, effect of castration on, of an experimental prostatic tumour (Mainwaring, W. I. P. & Williams, D. C.) 836
Ribonucleic acid-polymerase activity, effect of castration on, in an experimental prostatic tumour (Mainwaring, W. I. P. & Williams, D. C.) 836
Ribonucleic acid polymerase, deoxyribonucleic acid-dependent, activity of, during the early action of thyroid hormones (Tata, J. R. & Widnell, C. C.) 604
Ribonucleic acid polymerase, deoxyribonucleic acid-dependent, additive effects of thyroid hormone, growth hormone and testosterone on (Widnell, C. C. & Tata, J. R.) 621
Ribonucleic acid polymerase, deoxyribonucleic acid-dependent, of Krebs II ascites-tumour cells, asymmetric transcription of deoxyribonucleic acid by (Shenkin, A. & Burdon, R. H.) 5C
Ribonucleic acid, ribosomal, secondary structure of, in solution (Cox, R. A.) 841
Ribonucleic acid, soluble, puromycin-initiated release of, from ribosomes of *Escherichia coli* (Cannon, M.) 5P
Ribonucleic acids, synthesis of, during the early action of thyroid hormones (Tata, J. R. & Widnell, C. C.) 604
Ribosomal particles of *Pisum arvense* (Barker, G. R. & Rieber, M.) 4P
Ribosomes, factors controlling amino acid incorporation by, from Krebs II mouse ascites-tumour cells (Kerr, I. M., Cohen, N. & Work, T. S.) 826
Ribosomes, puromycin-initiated release of soluble ribonucleic acid from, of *Escherichia coli* (Cannon, M.) 5P
Ribosomes, secondary structure of ribonucleic acid of, in solution (Cox, R. A.) 841
Rumen epithelium, isolated, transport and metabolism of fatty acids by (Hird, F. J. R., Jackson, R. B. & Weidemann, M. J.) 394
Rumen micro-organisms, biohydrogenation of α-linolenic acid and oleic acid by (Wilde, P. F. & Dawson, R. M. C.) 469

Salicylic acid, inhibition of mucoprotein biosynthesis in the sheep colonic mucosa *in vitro* by (Allen, A. & Kent, P. W.) 13P
Salmonella typhimurium, methionine synthesis by extracts of (Cauthen, S. E., Foster, M. A. & Woods, D. D.) 630
Sarcoplasm, skeletal-muscle, isolation and properties of a basic protein from (Scopes, R. K.) 193
Scorpions, detection of agmatine conjugates in (Hitchcock, M. & Smith, J. N.) 736

Semen, human, cholesterol in (Eliasson, R.) 242
Semicarbazide, action of, on the aggregation of the tropocollagen macromolecule (Convy, S. & Wynn, C. H.) 46 P
Serine, determination of, as the dinitrophenyl derivative (Matheson, N. A. & Sheltawy, M.) 297
Serum lipoproteins, investigation of, and of their contribution to milk fat in the dairy cow (Glascock, R. F., Welch, V. A., Bishop, C., Davies, T., Wright, E. W. & Noble, R. C.) 149
Sex and gonadal hormones, effect of, on rat plasma lipids during the development of an essential fatty acid deficiency (Lyman, R. L., Ostwald, R., Bouchard, P. & Shannon, A.) 438
Shigella flexneri lipopolysaccharides, quantitative analysis of the monosaccharide constituents of (Simmons, D. A. R.) 903
Silkworm (*Bombyx mori* L.), metabolism of saturated 1-^{14}C-labelled fatty acids in (Sridhara, S., Ravi Rao, U. & Bhat, J. V.) 260
Skin, rat, oxygen consumption and uptake of glucose by (Patnaik, B. K. & Kanungo, M. S.) 374
Sperm-whale ferrimyoglobin, absorption spectra of (Hanania, G. I. H., Yeghiayan, A. & Cameron, B. F.) 189
Sperm-whale myoglobin, differentiation of, from finback-whale myoglobin (Atassi, M. Z. & Saplin, B. J.) 82
Sphingolipids, cerebral, role of the polar groups of, in their properties at the air–water interface (Gammack, D. B. & Raper, J. H.) 21 P
Sphingomyelin, enzymic hydrolysis of, by rat liver (Heller, M. & Shapiro, B.) 763
Spingomyelins, cerebral, in monomolecular films (Raper, J. H., Gammack, D. B. & Sloane-Stanley, G. H.) 21 P
Squalene and sterols, biosynthesis of, by the adipose tissue of rat, sheep and man (Durr, I. F.) 317
Staphylococcus aureus (strain Duncan), ribonucleases of (Barker, G. R. & Pavlik, J. G.) 4 P
Sterols, biosynthesis of, by the adipose tissue of rat, sheep and man (Durr, I. F.) 317
Stomach, pig, minor proteases in (Ryle, A. P.) 485
Streptomyces griseus, 3-*O*-methyl-D-mannose from (Candy, D. J. & Baddiley, J.) 15
Sucrose, extracellular release of lysosomal enzymes in response to (Fell, H. B. & Dingle, J. T.) 40 P
Sucrose, utilization of, by *Zymomonas mobilis* (Dawes, E. A., Ribbons, D. W. & Rees, D. A.) 804
Sugars, microchemical differentiation between optical isomers of (Clarke, E. G. C. & Humphreys, D. J.) 36 P
Sulphatase A, possible hydrophobic bonding in (Roy, A. B. & Nichol, L. W.) 29 P
Sulphate, effect of the stage of vitamin A deficiency on the activation of, in rat liver (Subba Rao, K. & Ganguly, J.) 693
[^{35}S]Sulphate, incorporation of, in studies on an early intermediate in the biosynthesis of biotin (Eisenberg, M. A.) 15 C
Sulpholipid, biosynthesis of, by *Euglena gracilis* (Davies, W. H., Mercer, E. I. & Goodwin, T. W.) 369
Sulpholipids, cellular-membrane, metabolism of, in rat brain (Davison, A. N. & Gregson, N. A.) 915
Sulphonamides, kinetics of the inhibition of carbonic anhydrase by (Kernohan, J. C.) 31 P
6-Sulphoquinovose, biosynthesis of, by *Euglena gracilis* (Davies, W. H., Mercer, E. I. & Goodwin, T. W.) 369
Sulphur content of wool, relationship of, to high-sulphur proteins (Gillespie, J. M. & Reis, P. J.) 669

Tea plant (*Camellia sinensis* L.), properties and distribution of 5-dehydroshikimate reductase in (Sanderson, G. W.) 248
Testis, ram, purification of β-acetylglucosaminase and β-galactosidase from (Caygill, J. C., Roston, C. P. J. & Jevons, F. R.) 405
Testis, rat, maturing, changes in lipid composition of (Davis, J. T., Bridges, R. B. & Coniglio, J. G.) 342
Testosterone, growth hormone and thyroid hormone, additive effects of, on deoxyribonucleic acid-dependent ribonucleic acid polymerase in rat-liver nuclei (Widnell, C. C. & Tata, J. R.) 621
[4-^{14}C]Testosterone, metabolism of, by human and canine prostate gland (Aliapoulios, M. A., Chamberlain, J., Jagarinec, N. & Ofner, P.) 15 P
4,5,6,7-Tetrachloro-2-trifluoromethylbenzimidazole, uncoupling of respiratory-chain phosphorylation by (Beechey, R. B.) 284
Thiamine, biosynthesis of, in yeast (Johnson, D. B., Howells, D. J. & Goodwin, T. W.) 30
Thiamine, *see* Vitamin B_1
Thiobacillus strain C, oxidation of thiosulphate by (Kelly, D. P. & Syrett, P. J.) 537
Thiol groups in xanthine oxidase, reaction of, with iodoacetamide (Bray, R. C. & Watts, D. C.) 142
Thiols, enzymic oxidation of (Bocks, S. M.) 9 C
[^{35}S]Thiosulphate, oxidation of, by *Thiobacillus* strain C (Kelly, D. P. & Syrett, P. J.) 537
Thymidine and thymine deoxynucleotides, selective degradation of, with osmium tetroxide (Burton, K. & Riley, W. T.) 70
Thymidine, incorporation of, into deoxyribonucleic acid in mouse fibroblasts infected with polyoma virus (Molteni, P., De Simone, V., Grosso, E., Bianchi, P. A. & Polli, E.) 78
Thymus gland, rat, metabolic properties of histones from (Ord, M. G. & Stocken, L. A.) 888
Thymus, rat, histones of (Ord, M. G. & Stocken, L. A.) 5 P
Thyroid hormone, growth hormone and testosterone, additive effects of, on deoxyribonucleic acid-dependent ribonucleic acid polymerase in rat-liver nuclei (Widnell, C. C. & Tata, J. R.) 621
Thyroid hormones, ribonucleic acid synthesis during the early action of (Tata, J. R. & Widnell, C. C.) 604
Thyroid-stimulating activity, long-acting, proteolysis of immunoglobulin G with (Dorrington, K. J., Carneiro, L. & Munro, D. S.) 858
Tobacco-leaf tissue, effect of 6-furfurylaminopurine on senescence of, after harvest (Anderson, J. W. & Rowan, K. S.) 401
Transfructosylase in tubers of *Helianthus tuberosus* L. (Edelman, J. & Dickerson, A. G.) 787
Tricarboxylic acid cycle and glycolysis in relation to ion transport by the ciliary body (Riley, M. V.) 898
Tricarboxylic acid-cycle intermediates and hexokinase, effect of, on fatty acid oxidation and formation of ketone bodies by rat-liver mitochondria (Hird, F. J. R., Symons, R. H. & Weidemann, M. J.) 389
Triglycerides, changes in the composition of, in the maturing rat testis (Davis, J. T., Bridges, R. B. & Coniglio, J. G.) 342
Triglycerides of lipoproteins, transfer of, from serum to milk in the dairy cow (Glascock, R. F., Welch, V. A., Bishop, C., Davies, T., Wright, E. W. & Noble, R. C.) 149
Triphosphoinositide, incorporation of [^{32}P]phosphate into, of subcellular fractions from young rat brain (Kai, M. & Hawthorne, J. N.) 62
Trithionate, production of, during thiosulphate oxidation by *Thiobacillus* strain C (Kelly, D. P. & Syrett, P. J.) 537
Tropocollagen macromolecules, action of semicarbazide on the aggregation of (Convy, S. & Wynn, C. H.) 46 P
Trypsin, dextran-gel filtration of, in the presence of high-molecular-weight substrate (Auricchio, F. & Bruni, C. B.) 290

Tryptamine and catecholamine derivatives, fluorescence method for the detection and possible quantitative assay of, on paper (Bell, E. C. & Somerville, A. R.) 1c
Tulip, isolation of γ-ethylideneglutamic acid from (Fowden, L.) 57
Tumour, prostatic, experimental, effect of castration on the ribonucleic acid metabolism of (Mainwaring, W. I. P. & Williams, D. C.) 836
Turnip yellow-mosaic virus, secondary structure of ribonucleic acid from, in solution (Cox, R. A.) 841
L-Tyrosine *O*-sulphate, a rat-tissue aminotransferase acting on (Rose, F. A., Flanagan, T. H. & John, R. A.) 168
L-Tyrosyl-L-alanine, biological sulphation of (Jones, J. G., Scotland, S. M. & Dodgson, K. S.) 138
L-Tyrosylglycine, biological sulphation of (Jones, J. G., Scotland, S. M. & Dodgson, K. S.) 138

Ultraviolet irradiation, effect of, on collagen-fold formation in gelatin (Cooper, D. R. & Davidson, R. J.) 655
Uracil in formic acid hydrolysates of deoxyribonucleic acid (Schein, A. H.) 311
Uridine 5′-pyrophosphate glucuronyltransferase, liver, multiplicity of, from its varying pattern of development with different substrates and species (Dutton, G. J. & Lawes, J.) 30P

Vitamin A, effect of the stage of deficiency of, on sulphate activation in rat liver (Subba Rao, K. & Ganguly, J.) 693
Vitamin A status, influence of, on the proteolytic activity of extracts from the livers and kidneys of rats (Dingle, J. T., Sharman, I. M. & Moore, T.) 476
Vitamin B_1, control of biosynthesis of (Newell, P. C. & Tucker, R. G.) 39P
Vitamin B_6 group, fluorescence studies on compounds of (Bridges, J. W., Davies, D. S. & Williams, R. T.) 451
Vitamin B_{12}, studies on the biosynthesis of the corrin ring of (Burnham, B. F. & Plane, R. A.) 13C
Vitamin C, ^{14}C-labelled, use of 5,6-mono-*O*-cyclohexylidene-L-ascorbic acid as an intermediate in the synthesis of (Von Schuching, S. L. & Frye, G. H.) 652
Vitamin C, stable cyclohexylidene derivative of, used as an intermediate for synthesis of [^{14}C]vitamin C (Von Schuching, S. L. & Frye, G. H.) 652
Vitamins D_2 and D_3, differentiation and assay of, by gas–liquid chromatography (Murray, T. K., Day, K. C. & Kodicek, E.) 293

Wheat, root-cap cells of, a function of the Golgi apparatus in polysaccharide synthesis and transport in (Northcote, D. H. & Pickett-Heaps, J. D.) 159
Whelk (*Buccinum undatum* L.), the polysaccharide sulphate component of the hypobranchial mucin of (Hunt, S. & Jevons, F. R.) 522
Wool proteins, high-sulphur, dietary-regulated biosynthesis of (Gillespie, J. M. & Reis, P. J.) 669

Xanthine oxidase, reaction of, with iodoacetamide (Bray, R. C. & Watts, D. C.) 142
β-Xylosidases of animal and other sources in relation to the degradation of chondroitin sulphate–peptide complexes (Fisher, D., Higham, M., Kent, P. W. & Pritchard, P.) 46P

Yeast, biosynthesis of thiamine in (Johnson, D. B., Howells, D. J. & Goodwin, T. W.) 30
Yeast, changes in dry weight, protein, deoxyribonucleic acid, ribonucleic acid and reserve and structural carbohydrate during the aerobic growth cycle of (Polakis, E. S. & Bartley, W.) 883
Yeast, control of enzyme patterns in (Holzer, H.) 37P
Yeast, molecular structure of the glucan of (Manners, D. J. & Patterson, J. C.) 19C
Yeasts, interactions between environmental and mutational effects in (Barker, G. R.) 1P

Zinc as a cofactor for cephalosporinase from *Bacillus cereus* 569 (Sabath, L. D. & Abraham, E. P.) 11C
Zinc protoporphyrin and haem, effect of lipids and organic solvents on the enzymic formation of (Mazanowska, A. M., Neuberger, A. & Tait, G. H.) 117
Zymomonas mobilis, route of ethanol formation in (Dawes, E. A., Ribbons, D. W. & Large, P. J.) 795
Zymomonas mobilis, sucrose utilization and formation of a levan by (Dawes, E. A., Ribbons, D. W. & Rees, D. A.) 804
